V-Grip Air

Improved ergonomics designed for vertical shooting

Designed for perfect integration with the Phase one 645DF camera
The Phase One V-Grip excels with all shooting control buttons replicated in exact same positions as on the camera body but now in vertical position.
Using custom functions to change the individual button settings will replicate in exact same way on the Vertical grip.
Ergonomics are improved by a longer and better grip in both vertical and horizontal position. The length of the grip gives a really good user experience for photographers with all sizes of hands.
For further ergonomic improvements the V-Grip Air comes with a high quality genuine leather hand strap. The leather hand strap is designed to give extra hand support but also works as a safety strap and provides a better grip, without risk of hazardous drops.

PHASEONE

what the world's best photography is made of

V-Grip Air Features

- Improved Ergonomics for Vertical shooting
- Wireless flash sync up to 1/1600s
- Lithium Ion battery or Standard AA batteries
- Genuine leather hand strap
- Integrated L-bracket w. Arca Swiss mount

Wireless flash synchronization up to 1/1600s

The Phase One V-Grip Air features, as the first of its kind, a built in Profoto Air flash trigger. This means that you can now trigger your flash equipment remotely without any use of cables. All Profoto Air equipped generators are supported, and with other flash brands the Profoto Air transceiver can easily be installed in the flash jack socket. Profoto Air system is the only system in the market that supports up to 1/1600s flash synchronization.

The Profoto Air system is operating on one of eight selectable radio channels on the 2.4 GHz radio frequency band, for world wide use

Lithium-Ion or standard AA batteries

The V-Grip Air is conveniently powered by standard digital back rechargeable Li-Ion batteries. Phase One, Leaf and Mamiya batteries will all fit in the V-Grip battery compartment so you can now use the same type battery in the digital back and in the camera (with vertical grip).

Optionally you can install standard type AA batteries for use as a backup solution. You can switch between the two battery sources manually on the V-Grip.

V-Grip Air Features

Genuine Leather hand strap

The Phase One V-Grip Air features a genuine leather Hand Strap. The hand strap gives extra support to the wrist making it easier to hold your camera in a steady position. It also functions as a security strap, giving a much better right hand grip on the camera when working on location or in studio. A second hand strap* can be mounted for extra support in both vertical and horizontal mode (* extra hand strap may be purchased separately part # 71061).

Arca Swiss type tripod mount

The integrated L-bracket and the screw in tripod mount ensures that the camera can be mounted in both vertical and horizontal position.

Phase One L-Bracket mounting plate fits in all Arca- Swiss compatible quick-release stand mounting systems.

Compatible tripod heads include original:
Arca Swiss Monoball Z series, Monoball P series and Cube series.
