

**Product designation****Balloon**

Article no. 33.161.00

**Product description**

Special area light as accessory to Unilite, Pulso and Primo lamps and the entire range of broncolor monolights.

UV resistant acrylic glass sphere, opal, diameter 50 cm / 19.6" with black plastic socket and Pulso bayonet.

**Scope of delivery**

Acrylic glass sphere with plastic socket and Pulso bayonet.

**Technical data**

Diameter	50 cm / 19.6 "
Number of flashes	With a cooled down Balloon a continuous series of: maximum 100 flashes (flash output 3200 J / halogen modelling light 300 W) or maximum 50 flashes (flash output 3200 J / halogen modelling light 650 W) is permitted

**Compatibility**

Lamps	Unilite, Pulso and Primo lamp bases
Monolights	Minipuls, Compuls, Minipuls C, Minipuls D, Minicom

**Application**

The area light with a 360° light angle is ideal for shooting interiors, and portrait photography. Due to the characteristic of the light, unconventional light control is also possible.

**Special features**

To prevent overheating additional lamps must be located at a minimum distance of 1 meter away from the acrylic glass sphere. A cooling-off period of approx. 30 minutes must be observed after a continuous series of maximum 100 respectively 50 flashes.

A warm Balloon must never be put down on its acrylic glass sphere, only on its socket.
